

RAGHAD AL-DAWSARI

Data Analyst | Power BI · SQL · Python · Chemistry Background

Saudi Arabia | +966 55 304 8827 | raghadalmitrk@gmail.com | linkedin.com/in/raghad-aldawsari

PROFESSIONAL SUMMARY

Data Analyst with a chemistry foundation and hands-on project experience in Power BI, DAX, SQL, and Python. Builds interactive dashboards and KPI reports from large, multi-source datasets across energy, sustainability, and emergency-operations domains. Strong in data cleaning, validation, and data quality. Seeking to support data-driven decision-making in the energy sector, in line with Saudi Vision 2030.

TECHNICAL SKILLS

Data & Analytics	Power BI · DAX · Power Query · SQL (MySQL) · Python (Pandas, NumPy, Matplotlib) · Excel
Processes	ETL · Data Cleaning & Validation · Dashboard Development · KPI Tracking · Trend Analysis · Reporting
Quality & Compliance	ISO 9001:2015 QMS Awareness · HSE Industrial Safety · Technical Documentation
Soft Skills	Analytical Thinking · Problem Solving · Stakeholder Communication · Attention to Detail

ANALYTICS PROJECTS

Saudi Electricity Consumption Analysis (2005–2025)	Power BI · DAX · Data Cleaning	2026
- Cleaned and analyzed 20 years of national electricity consumption data (KAPSARC Data Portal) by region and sector, and built an interactive Power BI dashboard to explore the patterns. - Found that consumption grew from ~153M MWh in 2005 to 358M+ MWh in 2025 (4.3% CAGR), with a 3.5% decline in 2019 followed by strong 8.8% growth in 2025. - Showed the residential sector leads total consumption, while the Eastern Region stands out for industrial demand, with insights relevant to energy planning.		
IKEA Environmental Sustainability Dashboard	Power BI	2026
- Consolidated multi-year data (FY20–FY23) across Retail, Production, and Logistics; built KPI dashboards tracking CO2 reduction and renewable energy growth. - Analyzed a 22% CO2 reduction vs. the FY16 baseline, directly relevant to energy-savings reporting and efficiency KPIs.		
Saudi Red Crescent Emergency Operations Dashboard	Power BI	2026
- Processed 201,000+ records from multiple sources; validated data accuracy and built regional KPI dashboards highlighting 125,377 critical cases for operational monitoring and analysis. - Flagged anomalies and trends across datasets to ensure reporting integrity and timely decision-making.		
Saudi Weather & Environmental Insights	SQL · Python · Power BI	2025
Analyzed multi-year Saudi weather data (2022–2025) for climate trends relevant to energy infrastructure planning; developed a Weather Comfort Index (WCI) and Power BI dashboards.		
Walmart Sales Performance Analysis	SQL · Power BI	2025
Applied SQL-based seasonal analysis, identified a 7.84% sales increase during holiday periods, and delivered stakeholder-ready dashboards.		

PROFESSIONAL EXPERIENCE

Field Trainee	Armed Forces Hospital Laboratory, Wadi Ad-Dawasir	Jun 2021 – Aug 2021
- Managed laboratory specimen data while maintaining strict accuracy and data-integrity standards. - Applied quality control procedures and complied with HSE and documentation regulations; operated and calibrated high-precision analytical instruments.		

EDUCATION

B.Sc. in Chemistry	Prince Sattam Bin Abdulaziz University	2018 – 2022
GPA: 4.57 / 5.00, Second Class Honors Research: nanomaterial-based heavy metal removal from aqueous systems.		

CERTIFICATIONS

- Google Data Analytics Professional Certificate (2026) - Python Programming Essentials, Rice University (2025) - ISO 9001:2015 Quality Management Systems Awareness Training, 15 hrs, Al-Khabir Higher Institute (2024) - Industrial Occupational Health & Safety (HSE), Public Health Academy (2024)
